PROFILE

Multilingual, Baymard Institute–certified UX Professional with about 10 years' experience. Specialized in quantitative methods yet skilled across diverse research approaches. My most recent interest is data visualization to share insights in the most engaging and actionable way possible. Ambitious to lead cross-department projects from a UX Research perspective, ensuring decisions balance user needs with business goals.

WORK EXPERIENCE

G2A.COM

Senior UX Researcher 2023 - PRESENT

- Led a cross-department initiative to create periodic reports from surveys and internal data, developing a comprehensive user profile with socio-demographics, shopping, and gaming behavior.
- Oversaw mobile app optimisation through developing UX strategy aligned with evolving business goals and KPIs and addressing user needs and pain points through diverse research methods.
- Mentored junior UX researchers, fostering growth in quantitative and qualitative methods; enabled independent project leadership.

Maternity leave 2020 - 2022

UX Research Lead 2017 - 2020

- Mentored team through research decisions, guiding methodology choices and project prioritization, without direct line-management.
- Led multivariate testing on order fee levels and visual presentation, driving significant financial growth for the company by increasing conversion rate by 1 percentage point.
- Led a cross-functional Conversion Optimization Team comprising managers from multiple departments and transforming their ideas into a pipeline of over 90 experiments.

UX Researcher 2016 - 2017

- Used card sorting & tree testing for the main website navigation redesign
- Conducted on-site and remote usability tests on the new product page
- A/B tested multiple hypothesis, i.e., shorter checkout which lead to increased cart conversion rate by 5 percentage points.

TOOLS

- Microsoft Excel (Advanced data manipulation)
- Survey tools (e.g., Alchemer, Survicate, Google Forms)
- Usability testing tools (e.g., Sharewell, Lookback)
- Analytics tools (Google Analytics, Firebase, Hotjar, Clarity)
- Project Management Tools (Confluence, Jira, Trello, Miro)
- AI: ChatGPT, Perplexity, Lovable, Cursor
- Familiarity with design / prototyping tools (Figma, Sketch, Canva)
- Basic knowledge of SQL (Google BigQuery)

SKILLS

- Curiosity & proactiveness
- Scientific and data-driven approach
- Taking over initiative and ownership
- Cross-department collaboration
- Interpersonal communication
- Critical thinking

CERTIFICATES

- UX Professional by Baymard Institute
- Product Analytics by WITFLOW
- UX Strategy Fundamentals by Joe Natoli
- Conducting Usability Testing by IxDF
- User Methods and Best Practices by IxDF
